

## OVERVIEW

Practara is a Johannesburg-based consultancy, providing independent advisory services to companies in the metals, mining, and natural resources industries.

## ABOUT US

Practara employs some of the brightest minds from finance, geology, and engineering that are critically aligned with our core values of courage, curiosity, care, and trust.

## OUR KEY DIFFERENTIATORS

Financially-focussed, yet technically minded solutions.

Renewed approaches for an increasingly challenging industry and macroeconomic environment.

Long-standing collaborative relationships with a network of skilled and professional associates.

Focused on building long-standing client relationships that are rooted in trust and that engenders measurable value.

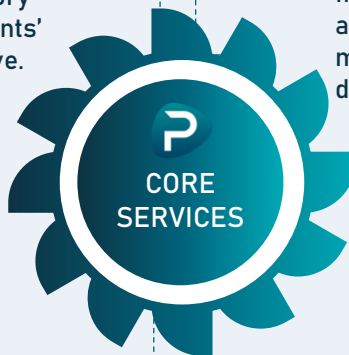

### FEASIBILITY STUDIES

In studies, we provide best-in-class techno-financial advisory services to progress our clients' projects along the value curve.

### MANAGEMENT SUPPORT & STRATEGY

As industry experts, we assist junior and mid-tier client teams in making sound strategic decisions regarding their mineral asset portfolio.

### DDs & TRANSACTION SUPPORT

We deploy our technical, financial, and market intelligence acumen to assist our clients in making sound investment / divestment decisions.

### VALUATION & COMPLIANCE

Our team of competent persons and valuers ensure that corporate reporting and valuations are performed in line with best practices and are code compliant.

## CONSULTING

Practara cares about our world and the future of it. We know that every company has inherent value waiting to be unearthed. As a result, we plough our expertise into your company's soil to improve the triple bottom line.

## ABOUT US

Established in 2015 with the vision of becoming the leading mineral economics consultancy in the world by 1) tapping into our local expertise in supporting the sustainable development of Africa's mineral wealth and 2) re-imagining how consulting services are rendered in an ever-increasing digital world

## FINANCIAL ANALYSIS

Engineering is the core foundation of our financial and cost models. We display how your capacities, efficiencies, and productivities drive margin and investment returns.

## TECHNICAL SERVICES

A network of skilled associate consultants across the globe bolsters our in-house team to provide tailor-made solutions to our clients' needs. From geological modelling and resource estimation to mine planning, processing, metallurgy and engineering.

Send us an email at [info@practara.co.za](mailto:info@practara.co.za) to book a free, no-obligation, session with one of our principals to see how best we can assist your firm in identifying, evaluating or executing your next capital project.
